

## Series 2200 Curtain Wall

---

The Series 2200 Curtain Wall system offers a reduced sightline for low to mid-rise applications where exterior glazing is desired. Complimenting the efficiency of insulated glass, Series 2200 is thermally improved by a continuous thermal spacer interlocked within the vertical and horizontal pressure plates. Dual colors can be achieved by specifying different finishes for the exterior face covers and interior mullions. A unique split vertical mullion for straight-in installation of each bay, special perimeter members for easy anchorage and the option to shop install is achieved with screw spline assembly.

- 2" Face dimension
- 2 7/8", 4" & 5" Back member depth
- Exterior glazed
- Thermally improved
- Pressure bar type glazing
- No exposed fasteners
- Shear block assembly
- Two-tone finish available
- Available in an array of architectural coatings and anodized finishes
