

Series 4250 & 4250T Curtain Wall Systems

Series 4250 & 4250T Curtain Walls are a stick-erected, interior-glazed curtain walls utilizing a pocket set design and E.P.D.M. compression glazing gaskets. The system features the Poly-Aluminizer™ thermal break technology. It was especially engineered to satisfy the increasing demands for energy conservation. Two-tone colors can be achieved by specifying different finishes for the exterior face covers and the interior mullions. Two-piece horizontals and shear blocks allow for concealed horizontal to vertical joinery without exposed screws. These joint intersections also have concealed injection-molded plastic end dams for controlling any infiltrated water.

- 2 1/2" x 6" system dimensions
- Stick wall installation
- Interior glazed
- Thermal or non-thermal versions available
- No exposed fasteners
- Shear block assembly
- Available in an array of architectural coatings and anodized finishes
