EXPERT TIPS

Visual indicators

Several Allegion brands have products equipped with visual indicators. This innovative feature immediately alerts a user about a door's locked or unlocked status.

In many applications, particularly in K-12 and higher education, indicators are part of the overall security plan. With indicators on locks or exit devices, an opening can be quickly assessed—from a distance—to determine if it is locked. The convenience of using at-a-glance indicators to assess a lock saves time and alleviates confusion in the event of an emergency.

Schlage ND Series indicator

- Clear direction on the inside of the lock on how to safely and quickly secure a room
- Available as a new product or retrofit to an existing ND Series lock

Available on ND Series

- (A) = Antimicrobial coating available on select finishes
- = Helps meet LEED certification
